**REQUEST FOR CERTIFICATE OF CORRECTION OF PATENT
FOR APPLICANT'S MISTAKE (37 CFR 1.323)**

Dear Sir:

1. Attached is Form PTO/SB/44 with at least one copy being suitable for printing
2. Applicant requests a correction of following words which were inadvertently included on the above-referenced patent due to a typographical mistake.

Claim 1, Page 30, Line 26

intersect (typo) should be replaced with **interact** (correct)

Claim 2, Page 30, Line 49

resister (typo) should be replaced with **register** (correct)

3. Applicant believes than an erroneous placement of the word "time" instead of the word "space" (Claim 16, page 32, line 33), and the word "event time" instead of the word "three dimensional space" (Claim 16, page 32, line 37) occurred due to a clerical error related to a cut and paste operation while employing parallel

Docket No. : 705397.4065

construction. Specification and argument indicate the logic of the requested correction.

Claim 16, Page 32, Line 33

“**time**” (incorrect) should be replaced with “**space**” (correct)

Claim 16, page 32, line 37

“**event time**” (incorrect) should be replaced with “**three dimensional space**” (correct)

Remarks: Applicant indicates that the corrections are supported by syntax, parallel construction, and word use in the claims themselves, especially between Claims 15 and 16, and in the drawings, and in the summary and specification throughout. The correction is further supported by arguments for Claim 16 to the USPTO, January 3, 2005, our attorney argument versus Chiussi as not including "space". Also "space" is already established in Claim 2; therefore the change does not expand because Claim 16, becomes only a combination of "space" as already granted in Claim 1, and "acquire" as already granted in Claim 15 and 16, and shown thought the specification and in Drawings, Figure 4, Registers "Acquire" (123000) and "Active Space" (111000), "Passive Space"(112000), and "Neutral Space" (113000), and described processes in Preferred Embodiment, and as describing processes in Figure 13 B, describing the acquisition of time and "space relevant" containers, and in Figure 13 C, and in Figure 14, "acquire 1404, edit 1405, or create a register 1406 to append or detach registers 120 to those containers" and Figure 16, and in paragraphs describing "an acquire register 123000, enabling the user to search and utilize other registers residing on the network".

4. Applicant believes that the above-referenced corrections do not constitute in the addition of new matter.

5. Fee and Method of Fee Payment for Certificate of Correction:
